Total Revenue:

Total_Revenue
16008872.119998764

Total Orders & Unique Customers:

Total_Orders	Unique_Customers
41562	40924

- Total revenue: ~\$16,008,872
- Total orders: 41,562 | Unique customers: 40,924

Insight: With unique customers (40,924) nearly equal to total orders (41,562), the vast majority of customers are one-time buyers (repeat purchase behavior is minimal). This is a major finding for an e-commerce business: customer retention, not just acquisition, is likely a bigger revenue lever than the current data shows being used.

Order Status Breakdown:

order_status	Order_Count
delivered	96478
shipped	1107
canceled	625
unavailable	609
invoiced	314
processing	301
created	5
approved	2

- Delivered: 96,478 | Shipped: 1,107 | Canceled: 625 | Unavailable: 609

Insight: Over 96% of orders reach "delivered" status, with cancellations at a fairly low ~0.6% — indicating a generally reliable fulfillment pipeline, though the "unavailable" status (609 orders) is worth flagging as inventory/stock-sync issues worth investigating.

	2018-09	4439.54	1022425.3199999953	-99.57

Insight: Revenue grew steadily through 2017, peaking in November (likely Black Friday seasonality — worth checking). The sharp collapse in Sep–Oct 2018 almost certainly indicates the dataset simply ends mid-way through that month, not a real business decline.

Month-Over-Month Growth: The Nov 2017 spike (+53% MoM) stands out against an otherwise stabilized growth pattern strongly suggestive of a seasonal event (Black Friday).

Top 10 Customers by lifetime Spend:

	customer_unique_id	customer_city	customer_state	total_spend

	5aad27a7b4f74b1c3389d56c74db1057	mafra	SC	3782.19

Insight: Spend is heavily concentrated at the top — the 1st customer outspends the 2nd by 2x, and the top 10 span multiple states (RJ, MS, ES, SP, PB, MG, SC) rather than clustering in one region, suggesting high-value customers exist nationally, not just in major hubs.

Rank customers within each state:

	CE	553	113217.71999999984	196.22
	PA	415	89647.61999999994	208.97
	MT	398	83230.60000000002	189.59
	MA	307	63255.64999999994	202.74
	PB	219	60063.920000000006	254.51

Insight: SP alone drives roughly 40% of orders and revenue, consistent with it being Brazil's largest economic hub. Interestingly, average order value is *lowest* in SP (\$137) compared to smaller states like PB (\$254) and MA (\$203) — suggesting SP has higher order *volume* but lower order *value*, while remote states have fewer but pricier orders (possibly due to bulk buying or higher shipping-inclusive pricing).

Payment Type breakdown:

	payment_type	num_payments	total_value	avg_installments
▶	credit_card	76795	12542084.189999327	3.5
	boleto	19784	2869361.2699999753	1.0
	voucher	5775	379436.8700000007	1.0
	debit_card	1529	217989.7900000001	1.0
	not_defined	3	0	1.0

Insight: Credit card is the primary payment method and the only one where customers spread payments across installments (avg 3.5), indicating price-sensitivity or larger basket sizes financed over time.

Delivery Performance:

Insight: While most orders arrive within or close to the estimated delivery window, isolated cases show delivery delays of 3-4 weeks beyond the estimate.
